

bio

susan frances smyth bolling

Susan is a sleuth.

She watches the world around her intently and tells our stories through her photos and writing.

When we travelled together, I saw people from around the world instantly warm to her. What shines through most is her ability to connect and her sincerity in everything she does.

Her enthusiasm is reflected in her products, written and photographed. They are consistently genuine and flattering.

Susan works tirelessly to condense the energy of the day into creative, honest photographs. Her photos of me rank amongst my very favorites and I continue to be impressed by the delicious depth of her writing.

Her arts-focused education is obvious in her art, but it's balanced by her corporate stint. Susan is somehow able to blend a mixture of artistic brilliance and practical decision-making.

She's a yoga junkie, a novice surfer, and a youth soccer coach. And she knocks together a mean trifle.
